- Road line and floor coating paint in light traffic roads.
- Floor coating paint in tennis courts.

Advantages

- It is single-component, dries quickly.
- It has perfect resistance against environmental conditions.
- It is polymethyl methacrylate based.
- It is thermoplastic and flexible.

Packaging

Net 20 kg in 1 pail.

Usage and Consumption

0,5 kg/m² (0,3 mm wet film thickness)
0,65 kg/m² (0,4 mm wet film thickness)

Disposal

Empty packages can be thrown to the collection bins according to regional-local regulations or recycling rules. After drying up and hardening the used waste material, throw it away as construction waste material. It is dangerous to dispose of product wastes by burning them.

Points to Take into Consideration

Keep the products in places out of reach of children. Always keep the cover of the products closed. It is recommended to wear gloves and goggles during operation. In case of contact of skin with the material, it should be washed with soap and water immediately. In case of contact with the eye, see your doctor immediately.

General Considerations

Above-mentioned product information and descriptions are prepared for guidance purposes as a result of our experiences and meticulous studies. The variety of related materials and their different construction and operation conditions can not be controlled or influenced by us individually. For applications beyond our control, the guarantee status is only limited to the quality of sold product. Except the manufacturing of the product, no guarantee is given for application. This technical sheet invalidates all the existing sheets. The quality of the performed job may vary depending on your professional use of the product. If you are hesitant, make a little test or get technical help.
